Cambodia

Bookmark: is the folder or book that contain favorite website/webpage that you want to keep.

Step to create Bookmark:

1. Show your Bookmark bar: There are different way to view on different browser.
2. Right click on Bookmark bar => create new folder=> give the name
3. Copy website or webpage that you want to keep => right click on your folder => past

You can create Bookmark by category:

Synchronize your Bookmark

Synchronize mean do two or more things to the same thing in the same time. Example. I synchronize my Bookmark in to two computer, it mean my two computers will have the same bookmark. If I update any website on my computer (1), it will have automatically on my computer (2).

Step to configure synchronize your book mark:

Different browser different way to register.

1. Make sure you have email account (gmail, yahoo, hot mail, ...)
2. Register your email account with browser that you use. (Mozilla Firefox, Chrome, Safari..) in your computer.
3. Chose what you want to sync. (History, bookmark, Add-ons)
4. Save change.

Login to other computer with your account (register with browser). So all your bookmark will sync to your second computer.
